Seeking a full-time Software Engineering Internship for Summer 2027

Education

San Jose State University **Aug 2026 - May 2028**
M.S. in Software Engineering

Illinois State University **Aug 2021 - May 2025**
B.S. in Computer Science (GPA: 3.6)

Skills

- **Languages:** TypeScript, JavaScript (ES6+), Java, Python, C/C++, SQL, HTML5, CSS3
- **Frameworks & Libraries:** React 19, Next.js, NestJS, Vite, TanStack Query/Router, Spring Boot, Redux, Express.js
- **Databases & Tools:** PostgreSQL, MySQL, Prisma, Drizzle ORM, Redis, BullMQ, Git, Docker, OpenAPI 3.1, Postman
- **Testing & Concepts:** Vitest, React Testing Library, JUnit, REST APIs, CI/CD, Agile/Scrum, responsive web design, WCAG accessibility, cross-browser testing.

Experience

Comprehensive Home Care | Chicago, IL **Oct 2025 – May 2026**
Web Developer

- Rebuilt and maintained a responsive healthcare website using Next.js, JavaScript, HTML, and CSS, improving performance, accessibility, and the overall client intake experience.
- Implemented client-side validation, responsive navigation, Google Maps integration, and reusable UI components to improve reliability and usability across devices.
- Performed cross-browser, mobile, accessibility, and network-condition testing, troubleshooting frontend issues and improving submission reliability and page performance.

Illinois State Solar Car Team | Normal, IL **Sept 2022 - May 2023**
Software Team Member

- Integrated MQTT telemetry between embedded sensors and data pipelines, giving the team real-time diagnostic data during vehicle testing.
- Profiled serial communication bottlenecks and refactored telemetry code, improving diagnostic accuracy by 20% and stabilizing continuous-run throughput.
- Used Git to coordinate interface changes with electrical and mechanical teammates, contributing to a vehicle that placed third in competition.

Technical Projects

Kioo | Productivity & Management Platform (NestJS, Redis, BullMQ, OpenAPI, React**)** **July 2026 – Present**

- Owned and shipped 20+ features for a multi-tenant document vault in a strict TypeScript monorepo, building core document, task, note, dashboard, navigation, and authentication workflows with React 19, Vite, NestJS, and PostgreSQL.
- Created shared modal, tag-selection, save-status, and token-based theming components reused across 5+ product areas, replacing one-off UI implementations and standardizing responsive light and dark modes.
- Built a keyboard-accessible authentication experience with focus-aware carousel controls and prefers-reduced-motion behavior; authored or updated tests across 76+ files using Vitest and React Testing Library.

LuxJewels | Full-Stack Ecommerce Platform (Next.js, TypeScript, PostgreSQL, Prisma, Stripe) **June 2025 – Nov 2025**

- Built and deployed a responsive Next.js storefront with authentication, persistent cart state, product browsing, and checkout-ready architecture.
- Developed a role-based administrative dashboard for managing products, orders, and inventory through a centralized interface.
- Modeled relational data with PostgreSQL and Prisma and optimized Next.js Server Actions and queries, reducing unnecessary payloa ds and keeping pages responsive.

Pickleball Scheduling Application (Springboot, Java, HTML, CSS, Javascript, JSON) **Jan 2023 - May 2023**

- Designed and implemented full-stack scheduling features in Java, following OOP and SDLC best practices, enabling efficient match organization for multiple users.
- Integrated data persistence with SQL and designed intuitive UI workflows, improving usability by 25% based on user feedback.
- Collaborated in Agile sprints, incorporating peer review and testing to ensure production-ready, maintainable code.

Real Estate Agent Website | (Wordpress, Javascript, HTML, CSS). **May 2024 - Aug 2024**

- Built a responsive, high-performance website using JavaScript, HTML, CSS, and WordPress, boosting client engagement by 35%.
- Worked closely with designers and stakeholders to translate business requirements into user-friendly interfaces, ensuring pixel-perfect, cross-browser performance.
- Optimized site assets and code, reducing load time by 30%, directly improving customer experience.
